

GRAVITY

Gravity is pulling me down

Gravity is holding me down

Gravity is spinning me round

Scientists say

Curvature of space time

Uneven mass spread

Forces between two bodies

Gravity is pulling me down

Gravity is holding me down

Gravity is spinning me round

It's pulling me down

Centrifugal forces abound

Giving weight to objects around

Creating waves of water and sound

Gravity is pulling me down

Gravity is holding me down

Gravity is spinning me round

It's pulling me down
