

Nature's Dance

(Love - about my life with Janice)

My time is to be here with you

Entwined by your side

From our first moment together

Continuing now and forever...it feels like Nature's dance

Lives on a parallel path

We journeyed so far some time

Under the southern cross filled sky

Hiding and fleeing from those rain filled clouds...it feels like Nature's dance

Bringing new life to join us

Creating more times to remember, remember

From infant cries to those high adventures

Another generation we created together...it feels like Nature's dance

Other souls have been here with us

Taking more energy and attention

Active life active love active together

Continuing now and forever, forever ...it feels like Nature's dance
