

## **PARADOX OF TIME**

The paradox of time

A measure of time

The clock that maps our lives

Does time really exist ?

Or is it a number in our minds?

Other life forms age

At a different pace

A 1000 year old tree

Compared to a butterfly's day

The theory of relativity

If we travel away from our earth

But what if this also applies

To the living things side by side?

The paradox of time

If time is just composed

of a past - no longer there

The future isn't real

As that has yet to manifest

This present moment - is just a literal instant

Then the riddle if time exists and that's why we have ...
